# What if...

Wyoming challenged  
itself to cultivate a  
better future?

## Exceptional Economic Development

What if we created a low-cost business environment as well as a low tax environment?

What if our regulatory environment was quicker, easier, and cheaper and the envy of the region?

What if we only spent public funds on efforts that bettered the quality of life and standard of living in our area?

What if we fully leveraged the potential economic impact of the military in our community?

What if we had adequate housing for every citizen in our community?

What if we were able to create a community with exceptional infrastructure and excellent transportation options like rail and air service?

## Relentless Action and Advocacy

What if we could create a statewide power for business issues in the state legislature?

What if we could elect solid moderate business candidates for every office?

What if we could double the amount of public funds spent in our community?

What if we could stabilize revenue streams through advocacy for a commonsense tax structure?

## Innovative Talent Development

What if every kid in Laramie County received a stellar education with emphasis in math and science?

What if our entrepreneurial ecosystem was filled with players that were educated to their potential and had the resources they needed to succeed.

What if we doubled the number of bachelor's degrees in our community and we tripled the number of advanced degrees?

What if tech education was available to every worker that wanted to pursue it?

## Transformative Community Development

What if people all over America were envious of the quality of life in our community?

What if we had a dedicated stream of money for community improvements like the splash pad etc.?

What if we were the gold standard for military communities across the nation?

What if we could create a group of leaders that continually bonded together for our future?
